

Sienna

Best specific weight on the AHDB Recommended List

Market Options: Malt Distilling & Feed

MBC Approval: MBC Approval

Sienna offers the best specific weight available, combined with low screenings and high hot water extract – traits desired by the malting industry.

Sienna is medium in height, offering good resistance to lodging and brackling. It has a good disease resistance profile, backed up by its high untreated grain yield in trials.

Sienna exhibits many of the positive traits associated with the feed variety Westminster, offering livestock farmers a higher yielding alternative. Sienna has competitive yields in all regions, outyielding Odyssey by 5% in the North and 4% in the West.

Strengths

- Carries Malting Barley Committee (MBC) Approval for malt distilling
- Best specific weight on RL
- High tillering with relatively long straw

Experts Advice

AHDB Comment: Added to the 2015/16 Recommended List as a high yielding variety with potential for brewing and malt distilling. A relatively late-maturing variety with a high specific weight and good resistance to brackling. Trials data suggests that it has high resistance to mildew.
