

Istabraq

Suitable for export, starch and distilling

Nabim Group: Group 4

Market Options: UK Distilling & Feed

OWBM Resistance: No

Rotational Position: First Cereal & Second Cereal

Sowing Date: Normal & Late

Istabraq is suitable for many outlets and offers flexibility in marketing. It has performed well when late sown as a second cereal, and is particularly suited to the north of the UK.

Consistency of performance over many years has been exceptional with Istabraq and the varieties ability to produce a bold grain sample has ensured the varieties inclusion in the rotation on farm.

Strengths

- Suited to North, showing consistency of performance
- Good all round disease profile
- Performs well as second cereal
- Good variety for late sowing

- Feed, distilling and export market opportunities
- Consistent performer
- Good performance on lighter soil types

Technical Information

Rothwell, Market Rasen,
Lincolnshire, LN7 6DT
