

KWS JACKAL

Winter Wheat

KWS Santiago x KWS W177

SEEDING
THE FUTURE
SINCE 1856

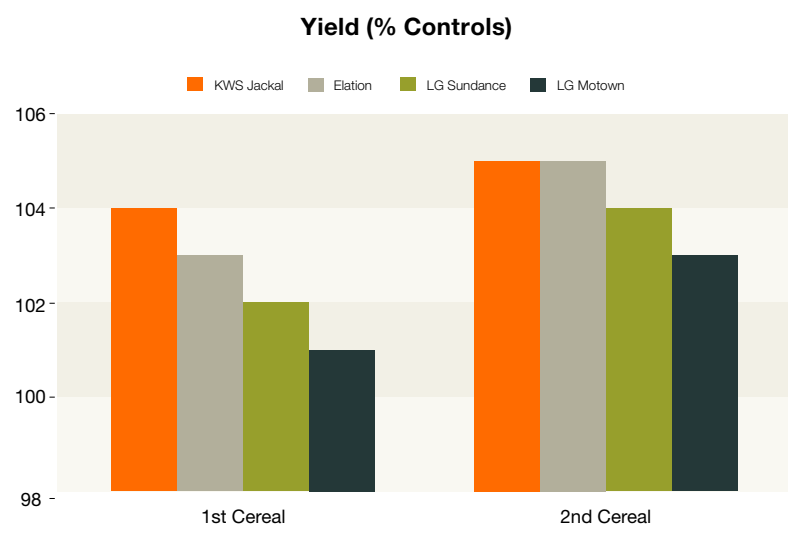

The UK's highest yielding soft wheat

- Suitable for distilling
- Outstanding yield potential, particularly in the North
- Good disease ratings
- Short-medium height with stiff straw
- OWBM resistance

Recommended for the North, KWS Jackal is the highest yielding soft wheat on the Recommended List UK wide.

KWS Jackal has high, consistent yields across regions, soil types and rotational position.

It is ideally suited to a range of end use markets, including bioethanol, distilling and soft milling. Further evaluation will take place with end users in 2018.
